How to layout your Streamlit app

About this app

This app shows the various ways on how you can layout your Streamlit app.

 Streamlit

Output

👉 Please enter your **name**!

👉 Please choose an **emoji**!

👉 Please choose your favorite **food**!

`st.set_page_config(layout="wide")` - Displays the contents of the app in wide mode (otherwise by default, the contents are encapsulated in a fixed box).

`st.sidebar` - Places the widgets or text/image displays in the sidebar.

`st.expander` - Places text/image displays inside a collapsible container box.

`st.columns` - Creates a tabular space (or column) within which contents can be placed inside.
